

A personal message from Brenda Christian

As President and CEO of Brenda Christian Cosmetics, Inc, my philosophy is simple: I want to develop cosmetics which truly nurture the skin. Working with my team of extremely talented chemists, I strive to create innovative, results-oriented cosmetics and skin treatments, always working to provide real solutions to

each of our everyday challenges.

Face it. Most of us are so busy juggling our personal and professional lives, that the last thing on our agenda is to see what's happening on the fashion design runways of the world, but we do want to stay up to date. That's where I come in, by translating what is happening in fashion into our every day lives. Yes, I'll tell you when dark lipstick is absolutely a no-no, but I'll also tell you to wear what makes you feel beautiful. I'll give you tips and tools to make your daily life just a little bit prettier, and a lot more comfortable, and hopefully iron out a few creases along the way.

For years, cosmetic companies have manufactured makeup and skin care products in order to sell them in large quantities through advertising and promotion. Women who purchased these products were actually purchasing an "advertising agency dream". There was a huge gap. So many of us really didn't know how to use what we had just purchased. This is why I made the important decision to market my products directly to you through professional estheticians and makeup artists with a focus on the health of the skin. This way, you have access to the knowledge you need to apply and use my formulas correctly. The "advertising dream" can now be a reality, and I am grateful to say that after twenty five years, many of our dreams have come true.

I want to personally thank you for allowing me to be a part of this very personal area of your life. Thank you for allowing me to pursue my passion and please know that to serve you is my privilege. I am both grateful and excited about our future together.

From my heart to yours,

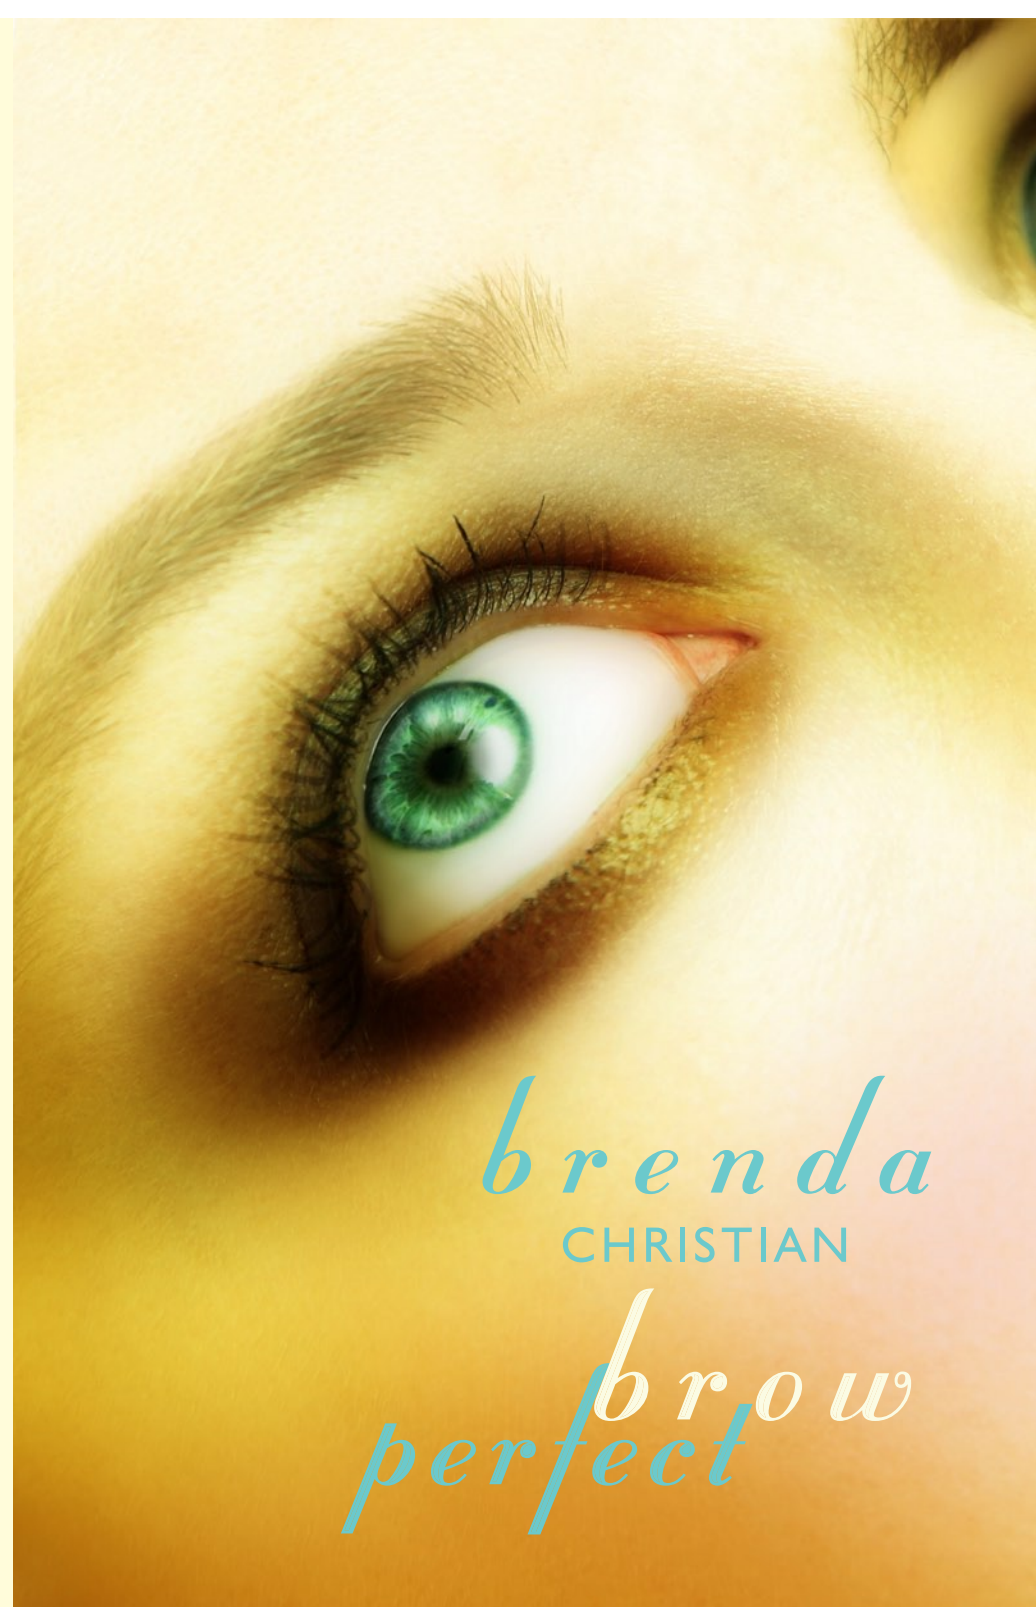

Brenda Christian

The Perfect Brow Kit with
Universal Brow Definer®
Perfect Brow® Gel &
Precision Blade Sharpener

THE MAKEUP PRO'S SECRET TO BEAUTIFUL, NATURAL EYEBROWS

Universal Brow Definer is a remarkable one-color eyebrow formula in a convenient pencil form that scientifically reads and automatically color adjusts to the pH of your eyebrow hair follicle. The Definer will not work on your hand or other areas of the face but is specifically designed to simulate eyebrow hairs. Upon touching the eyebrow area, Universal Brow Definer automatically adjusts from light to dark, warmer or cooler, to all natural eyebrow hair shades including Platinum Blonde, Soft Auburn, and deepest Brunette. One Color Works for Everyone!

Fragrance Free

Perfect for Sensitive Eyes and Skin

Always Your Perfect Eye Brow Color

Just stroke Universal Brow Definer over clean skin in your eyebrow area and watch as it automatically changes to the color of your own individual eyebrow hairs, filling in tiny gaps and perfecting your shape. The Definer even creates a fuller stroke toward the root of the hair, thinning to the end, just like your own natural eyebrow hair. If you have had a hair color service, Universal Brow Definer will refract the hair color you have chosen, causing your new hair color to blend more naturally with your own eyebrows.

Now, press Perfect Brow over the Universal Brow Definer and your brow transcends to a perfect, three-dimensional eyebrow. Individual eyebrow strokes are given shape with refractive light facets generated by Perfect Brow Gel. Even a close-up camera lens can't tell which brow hairs are your own and which arrived, picture perfect from Brenda Christian.

Hypo-allergenic

Never Looks Wet or Shiny

Natural Three Dimensional Appearance

Correct Mistakes from Waxing and Over Tweezing

brenda CHRISTIAN

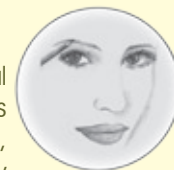

So Easy To Use:

Step 1

First sharpen your Universal Brow Definer using your Precision Blade Sharpener. Insert your pencil and make short quarter turns. The blade will actually create a sharp wedge at the tip of the pencil for the specific creation of eyebrow hairs.

Step 2

Always begin with a clean eyebrow area. Just apply Universal Brow Definer (UBD) to the eyebrow in very short, firm strokes working in the direction of the brow hair's natural growth, forming tiny little strokes from the roots. Stroke UBD into brow areas where you have any voids. Then stroke through all natural eyebrow hair in order to blend and perfect your color and shape.

Whether you are filling gaps in the brow area due to scar tissue, waxing or tweezing errors, or loss of hair due to Alopecia or chemotherapy, always follow the basic, natural brow shape, working from the bottom of the eyebrow line. Do not be concerned about applying too much. You can easily remove any excess with a tissue. Your eyebrows will be so natural because of Brenda Christian's special formula creating genuine hair like strokes.

Step 3

Set Universal Brow Definer with Perfect Brow for long-lasting, natural brow appearance and to enhance the color of your eyebrows. After applying Universal Brow Definer, press Perfect Brow over the entire eyebrow area. The special wiper / brush delivers a premeasured amount of Perfect Brow to the Universal Brow Definer application. The Perfect Brow brush is actually hollow and is filled with gel. The wiper/brush controls the application of gel so that the brows are always perfect and never appear wet or shiny.

Precision Blade Sharpener

Precision Blade Sharpener is unusual because it actually enhances the life of the user's pencil. If you have ever had difficulty sharpening your pencil without breaking off the point, just try the Precision Blade Sharpener. A German-made, handpolished stainless steel blade is housed in a high density ABS plastic case with two covers to protect the blade. Insert your pencil and make short quarter turns. The blade will actually create a sharp wedge at the tip of the pencil for the specific creation of eyebrow hairs. The blades are easily sanitized after sharpening with alcohol and a cotton swab.
